

World Cybersecurity Report Briefing & CSII Modules

PERTH: February 22, 25 | SYDNEY: February 28

THESE SPECIAL IN-DEPTH CYBER SECURITY SESSIONS WILL DELIVER:

// World Cybersecurity Reports & Local Implications

Get insight into the latest world cybersecurity reports and the outlook for 2017, including a review of RSA Conference 2017, San Francisco.

// Introduction to CSII: Cybersecurity Investigations & Intelligence

Developed in collaboration with Data Recovery Works, complete two CSII modules and learn the latest online search and intelligence gathering techniques to develop online situational awareness, information collection skills and important social media analysis and user tools.

#Course minimum requirements - Participants are required to bring in their own notebook with the following minimum requirements; 8GB RAM, wireless network and latest web browsers (IE, Firefox, Chrome) with flash and Java installed. Participants should have local admin privilege on the notebook to allow for network configuration.

Facilitator: Chris Cabbage is a widely-published security professional and industry commentator, including co-author of Corporate Security in the Asia Pacific Region. Chris is a Director and Executive Editor for the Asia Pacific Security Magazine, Australian Security Magazine and other technology channels including ChiefIT.me Magazine (ICT, cloud, big data) and DRASTICnews.com (Internet of Things). He is a contracted security advisor to government agencies, a former homicide detective and a federal commission investigator. Twitter @AmlecHouse @apsmagazine
